 KVp: 120.00
 Exposure: 30.00mAs
 Slice Thickness: 0.63mm

Referrals the way you'd like them to be

Suppose you refer a pet to a specialist who then performs a CT scan like the one shown overleaf. Wouldn't you like to see it and the diagnosis as soon as they're ready? Before the client sees them? Well now you can.

Keeping you informed

London Vet Specialists is a multi-disciplinary referral centre with a difference. We work closely with you, keeping you in the loop at all times via our dedicated online tool (image below). This enables you to find up-to-date information on each pet you've referred to us. You never have to chase us to find out what's going on. And you're always prepared to discuss the pet's situation with the owner.

See how our online tool helps you. Watch the video at londonvetspecialists.vet/video

Helping you with specialist care

It's not just our way of working we think you'll like. Based in the heart of London, our centre offers you state-of-the-art facilities, including the 16-slices GE Brivo CT Scanner that captured the image shown on the reverse.

Our expertise covers surgery, diagnostic imaging, emergency and critical care, anaesthesia, dermatology and medicine. We also have a radiographer on site. And we are the only referral centre in the capital offering full laparoscopic, thoracoscopic, cystoscopic and specialist critical care services.

Work with internationally respected specialists

 Consultant, practice dedicated to Internal Medicine, Oncology, Endoscopy

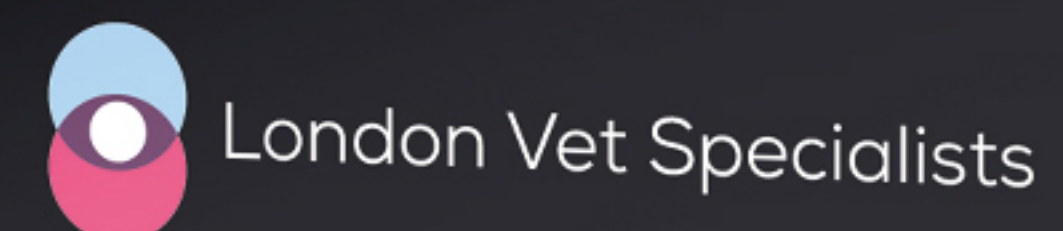

We look after pet owners, too

Our client relations team will greet your clients at our Belsize Park centre. Whilst caring for their pets, we'll help owners relax with a complimentary tea, coffee or cool drink. They can park their car nearby with our permit, or let us do it for them. And if they're staying a while, there's a local long-stay car park, too.

If you'd like the highest level of specialist care from vets who keep you in the loop, we hope you'll get in touch.
