

## WE SAY NO...

No to the old-fashioned, greedy way of investing. We detest the fat-cats making a fast buck regardless of consequences.

## WE SAY YES...

to capitalism with a conscience. Investments that deliver attractive returns by making the world a better place.

## WE ARE DIFFERENT.

We believe that doing good is good business.

We back high potential businesses, but only those that are well run. Companies that look after their people, communities and the environment. Because these companies deliver better returns in the long run.

We believe every person on the planet deserves the opportunity to succeed.

We share up to 25% of our fees to give people a hand up in the communities where we invest. By creating more opportunities to succeed, we help local economies develop and thrive. This, in turn, helps fuel our investments.

We are different. We create life-changing investments.

It's time to make a choice.

Choose to make money without selling your soul.

# A NEW WAY OF INVESTING
